

STIRRERS

SC-46 MAGNETIC STIRRER

Magnetic Stirrer is a compact laboratory device used for smooth and uniform mixing of liquids using a rotating magnetic field. It provides adjustable speed control, stable operation, and is ideal for chemical, pharmaceutical, and research laboratories.

Capacity Liter	
A	2 Liters
B	5 Liters

Optional:-

- i. Digital RPM speed indicator.
- ii. Digital temperature indicator cum controller.
- iii. Without hotplate.

SC-47 MICROPROCESSOR MAGNETIC STIRRER

Magnetic Stirrer is a compact laboratory device used for smooth and uniform mixing of liquids using a rotating magnetic field. It provides adjustable speed control, stable operation, and is ideal for chemical, pharmaceutical, and research laboratories.

Capacity Liter	
A	2 Liters
B	5 Liters

SC-48 LABORATORY STIRRER

Laboratory Stirrer is a reliable mixing device used for uniform stirring of liquids in laboratories. It offers adjustable speed control, stable performance, and is suitable for chemical, pharmaceutical, and research applications.

Optional:-

- i. Digital RPM indicator.

SC-49 TISSUE HOMOGENIZER

Capacity	
A	25 ml
B	50 ml

Optional:-

- i. Digital RPM indicator.
